

Technical drawing of the dust collector body connection flange. The left view is a side elevation showing a circular flange with a diameter of 1187 and a height of 1288. It features a central hub with a star-shaped pattern and a flange with 14 bolts. The right view is a top-down cross-section labeled 'A-A' showing the flange thickness and bolt details. Dimensions include 30-ø10 for the bolt holes, and diameters ø1088, ø1063, and ø1030 for the flange and hub sections.

A-A 除尘器简体连接法兰
